Industry's first built-in stacking functions
Boost image's brightness to 20,000 ANSI lumens
NEC NP3250 Projector

(Hong Kong – 1st December, 2009) NEC today announced a new LCD-based installation projector in its NP series – **NP3250**. The power of the NP3250 takes the images and presentations to new heights. The industry's first built-in stacking correction capabilities (up to four projectors) allows the projectors to boost an image's brightness up to 20,000 lumens, which is ideal for larger-sized screens and environments with heavy ambient light. Especially for corporate boardrooms, education lecture halls and public display environments.

**High brightness projection with Easy Stacking Function**

NP3250 delivers high-tech performance with a variety of advanced features that create flexibility for enhanced usage. Bright enough for most

applications, the projector display images up to 5,000 lumens. For the ultimate presentation, users may take advantage of its stacking capability, enabling up to 4 projectors to boost an image's brightness up to 20,000 lumens, which is ideal for larger-sized screens and environments with heavy ambient light. This feature also prevents the complete loss of an image, which can happen when using only 1 projector.

Support for Windows Media Connect and Shared Folder

The projectors include new features built into the Windows platform, such as Windows Media Connect Functionality, files of still pictures and video images stored on a PC connected to the LAN or a server can be played back directly with the projector via the network. For the shared folder, video images files can be played back directly with the viewer of the projector even if Windows Media Player is not installed on the PC.

Networkable projectors supporting Windows Vista

Additionally, NP3250 takes advantage of Windows Network Projector functionality within Windows Vista via the wireless adapter or integrated LAN port (RJ45) without the need for additional proprietary software. User can make presentations from PC via the network without connecting RGB cable. USB connection for a mouse and keyboard allow desktop control when the projector is connected via Windows Remote Desktop via a wired/wireless network connection. No administrator rights are required to display the screen contents on a networked projector

Optional Wireless LAN unit

Five types of optional lenses for flexible installation

NEC supplies five optional lenses for the projectors, so they can be adapted flexibly to various installation situations. The projector supports screen from 30-500 inches, throwing distance from 0.89m – 74.4m, resulting in a huge range of applications in areas such as digital signage, conferences and exhibitions.

The NP3250 projector provides the following features:

- 1024 x 768 native resolution
- 600:1 contrast ratio
- Brightness at 5,000 lumens
- Power consumption of 490 watts
- High brightness projection with Easy Stacking Function
- Five optional lenses available for flexible installation
- Manual lens shift
- Wired/wireless LAN capable
- Picture-in-Picture and Side-by-Side function
- Multiple input/output terminals
- HQV™ (Hollywood Quality Video) processing

Specification of NP3250

	NP3250
LCD Panel	0.8 inch LCD with Micro Lens Array
Resolution	XGA (1024 x 768)
Projection Distance	0.89 m to 20.83m (Standard Lens)
Aspect Ratio	4:3
Contrast Ratio	600 : 1
Brightness (ANSI lumens)	5,000ANSI
Lamp Life (Eco Mode)	2000H (3000H)
Quietness (Eco Mode)	38dB (31dB)
Image Size	30 to 500 inch (Standard Lens)
Power Consumption	490W – Normal 410W – Eco 26W – Standby
Built-In Speaker	10W
Input Terminals	RGB (Analog): 15 pin, 5-BNC RGB (Digital): DVI-I w/ HDCP Video 1: RCA, S-video, Component Audio: 5W stereo
Dimension (W x H x D) mm	399 (W) x 150.5 (H) x 358 (D) mm
Weight	7.3Kg
